Telex:265871(MONREF G) Quote"72:MAG60138 ATT G.HURST" in FIRST line.

V404 CYGNI

A preliminary sequence has been derived:

Star	Offset from Var in arcsec	PA	mag
F	090	155	12.9
G	140	285	13.6
H	185	310	14.0
J	135	320	14.5
K	100	180	15.2

Mags from photos by M.Mobberley:

May 26.99UT, 12.8; 27.96, 12.5; 28.98, 11.9; 29.96, 12.5.

Professional sources report fluctuations of 0.7 mags over a few minutes and spectral similarity to V616 Mon (IAUC 4786).

A chart with sequence is available on e-mail request.

Q1989/40

Brian Marsden asks for a check to be made of NGC 6207 located:

RA 16h41.3m DEC +36 56 (1950)

as a report has been received of an unconfirmed SN of mag 11-12.

Q1989/41

Martin Mobberley has recorded a nebulous streak 3' long on a photo of May 30.9? at 20h 14.7m DEC +33 54' (1950). If a comet, he estimates that the object of mag 12 is moving 5 degrees per day in either PA010 or PA190. Does anyone have photos as this is near V404 Cyg?

Guy M Hurst
