## COMET LEVY RUDENKO 1984+

Marsden telexes the following positions for this new discovery as follows:

1984 U.T.	RA	(1950)	Dec	Mag1	Observer
Nov. 14.12500	18h 47.0m	+9° 50'	+8	Levy	
Nov. 15.04861	18h 47.5m	+10° 15'	+10	Rudenko	

Both observers describe the comet as diffuse, without central condensation, nothing reported about a tail. The comet is well placed in the evening sky on the borders of Aquila, Ophiuchus and Hercules.

P. Birtwhistle
