COMET GEORGE (1989e1)

Douglas B. George, Kanata, near Ottawa, reports his visual
 discovery of a comet. The following observations are available:

1989 UT	R.A. (1950)	Decl.	ml	Observer
Dec. 18.031	19 52.3	+25 30	13	George
19.073	19 54.2	+25 35	10.5	Hale
19.115	19 54.4	+25 32	10.4	Levy

D. B. George (Kanata, ON). 0.40-m reflector.
 A. Hale (Las Cruces, NM). 0.41-m reflector. Object diffuse with
 central brightening.
 D. Levy (Tucson, AZ). 0.41-m reflector. Comet diffuse with slight
 condensation and 2' coma; faint sunward fan at p.a. 240 deg.
 IAUC 4925
