OUTBURST SW UMA (Q1990/25)

Patrick Schmeer, Bischmisheim, Federal Republic of Germany, reports
that SW UMA (UG star) located: RA 08h33.2m DEC +53 40' (1950) is in
outburst. This was confirmed by the Editor and subsequently other
independent results have been received:

Mar 12.836UT, [14.7(D.Stott); 13.784, 10.8 (Schmeer); 13.80, 10.8
(Schmeer); 13.822, 10.8 (Stott); 13.849, 10.7 (G.Hurst); 13.869,
10.4 (S.Lubbock, Bridgend); 13.902, 10.9 (M.Gainsford)

TASV 1924+57 (Q1990/20)

Mike Collins, Sandy, reports his discovery of a suspected variable
star at: RA 19h24.3m DEC +57 07' (1950) on photos for the UK Nova/
Supernova Patrol. On 1990 Mar 1.2UT, the magnitude was 10.0 based
on K2415 response whereas earlier estimates during 1989 place it
as faint as 11.6. An e-mail chart can be obtained from the
discoverer and a paper version from the Editor.

TA INDEX

We are delighted to welcome Jost Jahn of Germany to our group.
Those on JANET can e-mail him using MAIL:

CBS%UKC: "jjahn%uucp.cosmo"

If this does not work from your site then please contact the Editor.
